https://github.com/alisher201

LANGUAGE

- English pre-intermediate
- Uzbek

SKILLS SUMMARY

- Languages: JavaScript, TypeScript
- Frameworks: NodeJS, ExpressJS, NestJS, VueJS, NuxtJS
- Libraries: Bootstrap, Tailwind Css
- Tools: GIT, MongoDB, PostgreSQL, Sequelize
- Platforms: Linux, Windows

EXPERIENCE

TATU – Education system, Admin dashboard - I used it on the front end of the sitema
Link: <https://test-project-pi-nine.vercel.app/>
We created this site with a team. We did this through VueJs. I have participated in the Staff, Students, Groups, Tests and Results section of the site. To enter the site: { login: davlat, password: Davlat!! }

Online Market – I used it on the front end of the site
Link: <https://my-online-market.netlify.app/>
I did it through NuxtJs because it works well and fast for SEO. A responsive version of the site has also been made. The site is written in JavaScript. The site has no backend

SPomodoro – Time management - I used it on the front end of the site
Link: <https://pomodoro-app-my.netlify.app/>
I did it through VueJs. A responsive version of the site has also been made. The site is written in JavaScript

I worked at Al-Raqam Company for 4 months on my main projects: Kytob and BookType
